

Looking for a Mental Health App or Website?

Image credit: Adobe Stock

Summary: Problems with stress and mental health are unfortunately common in modern society. While many people could benefit from seeing a mental health professional, such as help is not always readily accessible. Fortunately, there is increasing evidence that e-MentalHealth interventions may be helpful for mental health, which includes apps and websites.

D's Story

D. is a young adult having problems with stress and anxiety. Unfortunately, she lives in a rural area, and there is no easy access to a mental health professional. She does an internet search on online help, but is overwhelmed by the number of websites that pop up. She decides to see her family physician to ask what apps she might recommend...

Apps

There is a growing number of apps for mental health but it can be challenging to know which ones are reputable, safe and effective. Only a tiny percentage are associated with credible healthcare organizations. On one hand, there are good apps that may be helpful. On the other hand, there are some apps which may be a waste of time and money, and worse, perhaps even harmful.

Specific Apps by Publicly Funded Organizations

Description	Issues Addressed	Age	Cost
Always There By Kids Help Phone A you to chat with or call Kids Help Phone. Android Store https://play.google.com/store/apps/details?id=com.speakfeel.khp_en&hl=en_CA iOS https://apps.apple.com/ca/app/always-there/id579718991	Mental Health	Children/youth	Free
